## The Medical Superintendent's

#### TWENTIETH ANNUAL REPORT.

The Medical Officer and Superintendent submits to the Twentieth Committee of Visitors the Twentieth Annual Report for the Report. year 1866.

On the 1st of January 1866 there were in the Asylum 325 Numbers Jan. 1, 1866. males, 430 females, total 755, which numbers include one female, Ellen Hagerty, absent on trial.

During the year 93 patients of each sex were admitted, Admissions making a total of 186, being a decrease as compared with 1865 Removals. of 30 men, and 47 women. There were discharged 81 males and 46 females, total 127, of whom 71, viz., 31 males and 40 females, were recovered; 21, viz., 17 men and 4 women, were relieved; and the remainder, 33 men and 2 women, were discharged not improved. The deaths numbered, males 33, females 23, total 56; giving again a satisfactory decrease as compared with previous years, and with those of 1865, when the mortality was very low, of 2 men and 15 women; and leaving in the Asylum, on the 1st of January, 1867, males 303, females 454, total 757, of whom 79 only, 34 men and 45 women, can be considered curable.

The mean daily population of the year was 317 men, 438 Mean daily women, total 755; and the highest and lowest numbers in the Asylum were on July 5th and September 14th respectively; on the former day there were 779 patients, viz., 338 men and 441 women, and on the latter 732 patients, 290 of whom were males and 442 females.

population.

Percentages of and Deaths.

The recoveries were 38.17 per cent. on the admissions, and Recoveries the mortality has again been less this year, viz., 5.95 per cent. as compared with 7 per cent. in 1865, 10.40 per cent. 1864, and 11.96 in 1863; the per centages of deaths being taken as is usual upon the total number under treatment.

Decrease in Admissions.

The great decrease in the number of admissions as compared with last year is explained by the over-crowded state of the Asylum, which has this year necessitated the refusal of a large Refusals, &c. number of applicants. Fifty-seven patients who sought admission having on this account been refused, viz., 29 men and 28 women. The last-mentioned numbers added to the admissions would raise the latter to about the average.

Accumulation of Chronic cases, &c.

The refusal of so large a number of recent cases has of course caused a proportionate rise in the number of Chronic and Of the 757 patients in the Asylum on the incurable patients. 1st January 1867, 89 only, viz., 45 men and 44 women, could be considered as tranquil or convalescent; whereas the dirty, violent, refractory, suicidal or dangerous, numbered 668, in the proportion of 259 males and 409 females; and these latter numbers have been since the commencement of the year still further proportionately augmented by the draught of about two dozen tranquil patients to the Asylum for the City of London, at Stone near Dartford.

Births.

The births of three male children have taken place during In one case twins—one child survived its birth only a few weeks, its infant brother was taken away by its mother upon her convalescence, which followed quickly upon her con-The third is still in the Asylum, but will shortly be finement. removed.

Overcrowded

Throughout the year the over-crowded state of the Asylum of Asylum. has again occupied our serious attention, and 40 male patients have been transferred to the Dartford Asylum, under a contract sanctioned by the Secretary of State; and a second, for the removal thence of females, is now lying at the Home Office for approval. The relief thus gained however will be but temporary.

On the 1st of March the Superintendent entered upon the Superintendent occupation of his newly-erected residence, and his old apart-Residence. ments have been fitted up as a Ward for the better class of female patients who now inhabit them.

The obituary of the year calls for little comment further than Obituary. to draw attention to the very small number of deaths which have taken place, many of which occurred at advanced periods of life as will be observed by Table No. 9. Three cases of sudden death however are registered; one was that of a man who died from choking; medical assistance was immediately at hand, but all attempts at restoration proved unavailing. A Coroner's Inquest was held upon the body, and a verdict in accordance with the facts of the case returned. The second was also a man who was carried off quickly in a severe Epileptic Fit; and the third was a woman whose death was the result of extensive disease of the heart. She was a general favorite alike with officers, attendants, and patients, and her sudden and unexpected decease cast a general gloom over the wards.

The general condition of the patients, considering the overcrowded state of the Asylum and the large accumulation of Chronic cases as above noticed, has been throughout the year very satisfactory, and their bodily health has been good.

General Condition of Patients.

On the 6th and 7th of December the Asylum was visited by two of the Commissioners in Lunacy, who reported favorably of the general condition of the Wards and Patients, and of "the "various changes and improvements which have been made "since their last visit." They conclude their report in the following words: "We are glad to be able again to report a "marked improvement in the general condition of this Asylum, "and we think that considering the great disadvantages under "which they labor, owing to the overcrowded state of the building, much credit is due to the Superintendent and Medical "Officers."

Commissioners in Lunacy.

One male attendant, after sixteen years service, was com-Superannupelled through ill health to resign his situation. During his Attendant.

employment in the Asylum he had received serious injuries from dangerous patients, which had doubtless accelerated his resignation. He was considered a deserving man, and the Committee shewed their appreciation of his services by granting him a superannuation allowance of £24 a year.

Death of Upholsterer.

It is with regret that I have to notice the death, from Pulmonary Consumption, of James Pledge the Upholsterer, which took place early in May.

Earth Closets, &c.

Attempts have been made, by the introduction of Earth Closets, to utilize a portion of the Asylum sewage; we have not however been successful in preventing the exhalation of offensive smells from them. An ingenious apparatus, the invention of Mr. Edward Hoar, called a "Water-Trap Closet," having the same object in view, will shortly be introduced for trial.

Increase in Attendants.

An increase in the number of attendants has taken place, to meet the requirements of the increase in the number of patients, and a second night nurse has been appointed on the female side of the main building.

Amusements, &c.

The exertions of the Officers have been continued throughout the past year to afford the patients all the recreation possible. The Theatrical Entertainments are kept up with much animation by Mr. Stevens, who is ably assisted by the Medical Officers, Messrs. Spencer and Hughes; as well as by Mrs. Stevens and other friends, and on the last occasion some of the patients took part in the performance. Weekly Readings have been commenced in the Concert Room, similar to the Penny Readings, which are calculated greatly to instruct as well as amuse the patients. A handsome Christmas tree adorns the Wards, and the distribution of the prizes from it is looked forward to with much pleasure, and it is in contemplation, as soon as the additional work common to this period of the year has been got over, to give occasional lectures of a Philosophical nature.

Gas in Chapel.

Gas is being laid on to the Chapel, which will enable a Weekday Evening Service to be held here instead of in the Wards as formerly, an arrangement not found to be satisfactory.

Further enlargement of the present additional Building is Enlargement of the The Contract of Messrs. Clements & Wallis, for now going on. £5565, was accepted by the Committee on the 18th August, and the works were commenced the following month. It is hoped that these buildings will be ready for occupation in the Autumn of 1867. The accommodation is for 43 patients of each sex. The other buildings to wit, the new offices and further accommodation for about 400 patients, will be commenced early in the Spring.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | က   

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | ಣ                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | :                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 67                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | -                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 4                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 100
